MISSION 300 COMPACT PROGRESS REPORT

SECOND CYCLE OF DATA COLLECTION 2025

 CÔTE D'IVOIRE

MARCH 2026

Disclaimer: This report has been prepared and validated by the Government through its Compact Delivery and Monitoring Unit (CDMU). While Mission 300 partners support the reporting process and its standardization, responsibility for the content, data, and interpretations rests solely with the Government.

DATA SOURCES AND DISCLAIMER

Under the **Mission 300 initiative**, progress on **National Energy Compacts** is monitored **twice a year** through data submitted by each country's **Compact Delivery and Monitoring Unit (CDMU)**.

Monitoring covers both **policy reform actions** and **key targets** across four thematic areas:

- Electricity access
- Clean cooking access
- Share of renewable energy in national generation
- Private Capital mobilized

Countries report progress using a **standardized Excel template**, based on which **Compact Progress Reports (CPRs)** are produced. Each CPR is **prepared and validated by the Government through its CDMU**. While Mission 300 partners support the reporting process, **countries retain full ownership of data and responsibility of its interpretation**.

This report presents the **latest country-reported data**, submitted during the **Q1 2026 reporting cycle** and reflects **progress achieved in 2025**. The data provided is **country-reported and based on national methodologies**, which may limit direct comparisons across countries.

DEFINITIONS & METHODOLOGY

Priority Reform Action Status

- **NOT YET DUE:** No activities initiated for this action
- **IN PROGRESS – ON TRACK:** Implementation progressing well, no issues to be reported
- **IN PROGRESS – MINOR DELAYS:** In Progress but slight issues or minor delays expected
- **IN PROGRESS – AT RISK:** In Progress but major challenges, high risk of delay expected
- **DELAYED:** Deadlines passed and activities remain incomplete
- **COMPLETED:** All implementation activities concluded

“Connections” and “People Provided with Electricity access” Methodology

“**New electricity connections**” refers to additional electricity connections established since the start of Mission 300 up to the reporting year, across all solution types (grid, mini-grids, and solar home systems). To estimate the number of people gaining electricity access, the number of new connections is multiplied by the national average household size provided by the government (when available). This conversion is illustrative and does not imply that each connection corresponds to exactly one household.

CÔTE D'IVOIRE NATIONAL ENERGY COMPACT

Under the **Mission 300 initiative**, Côte d'Ivoire presented its **National Energy Compact** in January 2025 at the Africa Energy Summit in Dar es Salaam, as part of the first cohort of twelve countries, outlining its reform commitments and targets to accelerate electricity access and mobilize private investment.

This Compact Progress Report tracks Côte d'Ivoire's progress against these commitments using data submitted by the Compact Delivery and Monitoring Unit (CDMU), with the latest update provided in January 2026.

KEY TARGETS

The reporting period covers progress until 31 December 2025.

Côte d'Ivoire has reported notable progress, particularly in **electricity access**, with **684,735 new household connections recorded in 2025**. Based on an average of 5.2 people per household, this corresponds to approximately **3,560,622 additional people gaining access to electricity in 2025**.

Access to clean cooking is estimated at 41% in 2025, with a 2030 target of 50%. However, this figure is based on data from the latest RGPB 2021. The actual results for 2025 are pending the survey scheduled under the Multi-Tier Framework (MTF).

Renewable energy share stands at 34% of national installed generation capacity. According to the 2025–2030 Supply-Demand balance, this share is expected to **fluctuate over the years, reaching the target of 45% by 2030**.

Private capital mobilized in 2024 totaled **USD 882 million**, progressing toward a **target of USD 1.940 billion by 2030**. The estimate for **2025** stands at roughly **USD 270 million**, though this figure is preliminary and pending final consolidation.

Quantitative data presented in this slide reflect the information available as of the latest reporting cycle provided by the Compact Delivery and Monitoring Unit (CDMU).

CÔTE D'IVOIRE

CÔTE D'IVOIRE'S PROGRESS ON HIGH-LEVEL COMPACT TARGETS

Key Target	2024 Baseline	Progress to date (over 2025)	2030 Target
People with new Electricity Access (# of people ¹)	23,857,350	+ 3,560,622	+ 17,000,000
Clean Cooking (% of population)	20%	41% ²	50%
Share of Renewable Energy in national generation (% of generation)	34%	32.8%	45%
Private Capital Mobilized (million USD)	\$882	+270 ³	+ \$1,940

¹ “People with New Electricity Access” refers to the number of additional people with electricity access

² Estimated value pending the results of the ongoing Multi-Tier Framework (MTF) survey

³ Preliminary figure, pending other private capital mobilized. Subject to further consideration.

OVERVIEW OF REFORMS ACTIONS STATUS

Côte d'Ivoire 	PILLAR I	PILLAR II	PILLAR III	PILLAR IV	PILLAR V	Total	STATUS		
	Expand Generation and Network Infrastructure at Competitive Costs	Leverage Benefits of Increased Regional Integration	Embrace Distributed Renewable Energy and Clean Cooking Solutions for Affordable Access	Incentivize Private Sector Participation to Unlock Additional Resources	Ensure Financial Viability and Enhance Operational Efficiency of Utilities		No of actions COMPLETED	No of actions IN PROGRESS*	No of actions DELAYED
Priority Actions	2	2	2	2	2	10	0	6	4
Other Actions	5	2	2	1	3	13	4	7	2
Total	7	4	4	3	5	23	4	13	6

* For the purposes of this table, all actions with an “In Progress” status are presented in aggregated form. In the original Priority Action reporting, this status is disaggregated into the following categories: (i) Not Yet Due; (ii) In Progress – On Track; (iii) In Progress – Minor Delays; and (iv) In Progress – At Risk. The disaggregated status by category is detailed in the next slide.

Reform Actions

Côte d'Ivoire’s National Energy Compact includes twenty-three (23) Reform Actions across the five pillars, of which ten (10) had been identified as Priority Reform Actions. Priority actions are subject to enhanced monitoring, while all remaining actions continue to be tracked by the CDMU.

By pillar, the distribution is as follows: Pillar I – 7 actions (2 priority); Pillar II – 4 actions (2 priority); Pillar III – 4 actions (2 priority); Pillar IV – 3 actions (2 priority); and Pillar V – 5 actions (2 priority).

In terms of status, as of January 2026, 4 actions are completed (including 0 priority action), 13 are in progress (including 6 priority actions) and 6 actions (of which 4 are priority actions) are reported as delayed.

FOCUS ON PRIORITY REFORMS ACTIONS STATUS

Côte d'Ivoire Energy Compact Priority Reform Actions						
#	Pillar	Commitment / Indicator	Priority Reform Actions	Deadline	Current Status	Previous Status
1	Pillar I - Expand Generation and Network Infrastructure at Competitive Costs	Integrated least-cost power system planning adopted incorporating regional resources	Finalize the Network Extension Master Plan in Rural Localities (PDELR) over the period 2025-2040	31-Mar-26	In Progress-On Track	N/A
2		Competitive procurement policy and framework in place for private-sector investment in power projects	Establish the framework to systematize competitive procurement procedures	31-Mar-26	In Progress-On Track	N/A
3	Pillar II - Leverage Benefits of Increased Regional Integration	Adopt and enforce harmonized transmission pricing within the respective power pools to facilitate the power trade across borders	Implement the following projects: 330 kV Côte d'Ivoire - Ghana interconnection project , the 330 kV Nigeria - Benin - Togo - Ghana - Côte d'Ivoire median backbone and the 225 kV Côte d'Ivoire - Liberia interconnection	31-Dec-30	In Progress-On Track	N/A
4		Adopt and enforce harmonized transmission pricing within the respective power pools to facilitate the power trade across borders	Introduce day-ahead-market within WAPP	31-Mar-26	In Progress-On Track	N/A
5	Pillar III - Embrace Distributed Renewable Energy and Clean Cooking Solutions for Affordable Access	Develop a National clean cooking strategy	Finalize the draft Bioenergy code	30-Jun-26	In Progress-On Track	N/A
6		Develop a National clean cooking strategy	National clean cooking strategy in place	31-May-26	In Progress-On Track	N/A
7	Pillar IV - Incentivize Private Sector Participation to Unlock Additional Resources	Process outlined for regulatory approval of private-sector-led mini-grids (including tariff regulations)	Develop, revise, test and adopt mini-grid regulations including streamlined process for mini-grid approvals	31-Dec-25	Delayed	N/A
8		Legal and regulatory frameworks to attract and support investments across the energy sector value chain	Implement regulations for self-generation	31-Dec-25	Delayed	N/A
9	Pillar V - Ensure Financial Viability and Enhance Operational Efficiency of Utilities	Utilities achieving at least 100 percent operational cost recovery	Define a strategy to improve the financial situation of utilities	31-Dec-25	Delayed	N/A
10		Utilities achieving at least 100 percent operational cost recovery	Optimize the tariff structure and Regularize tariff adjustments	30-Jun-25	Delayed	N/A

WORLD BANK GROUP

ABOUT MISSION 300

Mission 300 is a joint initiative by the World Bank Group and the African Development Bank (AfDB), supported by The Rockefeller Foundation, SEforALL, GEA (Global Energy Alliance), which aims to provide electricity access to 300 million Africans by 2030. This ambitious goal seeks to halve the current number of people without electricity on the continent, driving sustainable development through collaboration and innovative solutions
